

**Amendments to the Specification:**

Please amend the specification as follows:

Please replace the paragraph bridging pages 10 and 11 with the following rewritten paragraph:

The power unit 41 has a casing 49 that is constituted by combining a pair of split cases as shown in FIGS. 10, 16, and 17. A not shown driving motor for rotating the mirror apparatus unit 38 in the upper and the lower directions and a not shown driving motor for rotating the mirror apparatus unit 38 towards left and right are housed in the casing 49. Moreover the casing 49 is provided with a rod 50 for realizing the rotation of the mirror apparatus unit 38 in the upper and the lower directions and a rod 51 for realizing the rotation of the mirror apparatus unit 38 towards left and right. The rod 50 and the rod 51 are connected to the corresponding driving motors through rotational power transmission systems. An end portion of the rod 50 and the end portion of the rod 51 are provided with ball portions corresponding to the bearing portion 47 and the bearing portion 48.
